

Commercial Ice Cream Display Freezer

This commercial ice cream display freezer is designed for showcasing and preserving ice cream products. It features a transparent front panel, multi-tiered display area, and a digital temperature control system.

Product Overview

Professional Display Solution

This commercial ice cream display freezer is engineered for high-visibility retail environments, combining robust preservation technology with an attractive presentation. It features a multi-tiered display area with integrated illumination to maximize product appeal, while the transparent front panel ensures customers have a clear view of your offerings. Designed for reliability, the unit includes precise digital temperature controls and an automated defrost system to maintain optimal conditions for ice cream storage.

Technical Specifications

Cooling System

Built-in Refrigeration • Automated Defrost

Model Number	SD-98F
--------------	--------

Temperature Control	Digital
