

Commercial Ice Flake Production Machine

This ice flake machine is designed for commercial and industrial use. It features a stainless steel construction and an advanced refrigeration system to produce consistent, high-quality ice flakes.

Overview

Professional Ice Flake Solution

This commercial ice flake production machine is engineered to meet the rigorous demands of supermarkets, laboratories, and the healthcare industry. Featuring a robust 304 stainless steel construction, the unit ensures high-grade hygiene and durability. Its advanced screw scraper design minimizes resistance and noise, while the micro-computer controlled cooling system offers reliable, steady operation with simplified maintenance.

Performance

Daily Production Capacity	400kg - 50,000kg
Evaporation Temperature	-18 °C

Technical Specifications

Power Requirements	380V / 50Hz / 3HP
Compatible Refrigerants	R22, R404A

Design Features

Key Operational Features

- Screw scraper design for low resistance and noise
- Micro-computer automated cooling control
- Digital remote thermostat control
- Easy installation of cooling system and cylinder
- High-precision argon-arc welding

Cylinder Material	304 Stainless Steel
