Product Overview

Professional Commercial Ice Solution

This commercial ice maker is engineered for high-volume environments, providing a reliable and automated solution for restaurants, bars, and hospitality businesses. Its robust construction ensures durability, while the efficient refrigeration system guarantees rapid, high-quality ice production with reduced energy consumption. Designed for versatility, the unit supports both built-in and freestanding installations, making it an ideal fit for limited commercial spaces.

Performance

Production Capability

40 kg

Daily Output

Cooling System

Large cooling panel for enhanced thermal performance

Design & Build

Installation Compatibility

Built-in, Freestanding

Ventilation

Front ventilation system

Operations

Operation Mode

Fully Automatic

Suitable Applications

- Milk tea shops
- Coffee shops
- Convenience stores
- Hotels and restaurants
- Bars

Maintenance

Optimal Performance Maintenance

To ensure hygiene and longevity, regular cleaning of the internal components is recommended. The unit features an accessible water distribution system and ice forming grid that should be inspected periodically as part of standard maintenance routines.
