

Commercial Ice Maker and Crusher

This commercial ice maker and crusher efficiently produces and crushes ice for various applications. Its vertical, cylindrical design integrates controls, piping, and a support frame for self-contained operation.

Product Overview

Industrial-Grade Ice Solution

This commercial ice maker and crusher is engineered for high-volume environments requiring consistent ice production and processing. Featuring a robust vertical cylindrical design, the unit integrates advanced refrigeration and crushing mechanisms within a single self-contained frame. It is an ideal solution for large-scale operations that demand reliability and efficiency in ice management.

Key Features

Core Capabilities

- Integrated ice making and crushing
- Vertical cylindrical design
- Industrial-grade refrigeration system
- Self-contained support frame

Suitability

Commercial Use, Industrial Use, High-Volume Production

Technical Specifications

Construction

Vertical cylindrical unit

Control Interface

Yes
