

Commercial Kitchen Exhaust Fan

This industrial-grade kitchen exhaust fan is designed for efficient ventilation in commercial kitchens and food processing facilities. It features robust construction with a steel frame and a perforated metal screen for filtering out large particles and debris.

Overview

Industrial Ventilation Solution

This industrial-grade kitchen exhaust fan is engineered for high-performance ventilation in commercial kitchens and food processing facilities. It features a robust, durable design with a gray powder-coated steel frame for long-term reliability in demanding environments. The unit includes an integrated filtration screen and accessible maintenance panels, ensuring consistent airflow and simplified upkeep for professional kitchen operations.

Technical Specifications

Frame Material	Gray powder-coated steel
Mounting Style	Floor mounting with integrated support legs
Filtration	Perforated metal screen, Debris protection

Maintenance & Features

Maintenance Access

- Secure access door
- Easy inspection panel

Design Highlights

Industrial Grade • High Airflow • Floor Mounted
