

Commercial Laundry Drying Machine

This commercial drying machine is designed for efficient and reliable performance in high-volume laundry environments. It features a stainless steel drum and programmable micro-computer controls for precise temperature and time settings.

Overview

Industrial Laundry Solution

This high-performance commercial drying machine is engineered for heavy-duty laundry operations, including hotels, hospitals, and industrial facilities. It features a durable stainless steel drum and frame, ensuring long-term reliability and hygiene. With a programmable micro-computer and LED display, operators can precisely control drying temperature and time for optimal fabric care.

Certifications & Compliance

Certifications

CE, ISO 9001

Key Features

Main Features

- Stainless steel drum and frame
- Programmable micro-computer with LED display
- Self-cleaning lint filter
- Transparent toughened glass viewing window
- Steam or electric heating options
- Vertical structure design
