

Commercial Laundry Washer Extractor

This commercial laundry washer extractor is designed for efficient washing and dewatering. It features a stainless steel drum and programmable controls for customized wash cycles.

Overview

Professional Laundry Solutions

This fully automatic commercial washer extractor is designed for heavy-duty applications in hotels, hospitals, and industrial laundries. Featuring a robust 304 stainless steel drum and body, it combines washing and dewatering functions into a single efficient unit. The advanced suspension system and programmable computer controls ensure stable, energy-efficient operation even on higher floors.
