

Commercial Refrigeration Unit

These refrigeration units are designed for industrial and commercial applications. They feature efficient cooling and durable construction.

Product Overview

Industrial Cooling Performance

These professional-grade refrigeration units are engineered for high-demand commercial and industrial environments. Featuring advanced multi-fan cooling systems and a robust, modular frame, the units ensure consistent thermal stability and long-term durability. The design focuses on high-efficiency airflow and reliable operation for heavy-duty storage requirements.

Technical Specifications

Build Characteristics

- Robust industrial frame
- Rectangular housing design
- Modular construction

Cooling Architecture

Multi-fan system, Dual ventilation

Operational Metrics

Primary Application

Commercial • Industrial
