

Commercial Reverse Osmosis Water Purification System

This reverse osmosis water purification system is designed for commercial use in offices and public spaces. It features a five-stage RO purification process with UV sterilization and a fully automatic operation.

Overview

Commercial Reverse Osmosis System

This commercial-grade water purification system is designed to provide a reliable source of clean drinking water for residential communities, offices, and high-traffic public spaces. Featuring a comprehensive 5-stage reverse osmosis process augmented by an extra UV sterilization layer, it ensures high-quality output. The system operates fully automatically, making it an efficient and low-maintenance solution for self-service water vending applications.

Technical Specifications

Purification Stages	5 stages
Sterilization Method	UV Sterilizing
Automation	Fully Automatic

Application

Best For	Residential Communities, Office Buildings, Public Spaces, Commercial Vending
