

Commercial Sliding Glass Door Refrigerator

This commercial refrigerator features a sliding glass door for product display and easy access. It is equipped with digital temperature control, adjustable shelving, and interior LED lighting.

Product Overview

Commercial Vertical Showcase Refrigerator

This double-door vertical showcase refrigerator features an efficient forced air circulation system that ensures a well-distributed internal temperature for optimal product preservation. Designed for commercial use, the unit includes high-performance elements like a low-maintenance condenser and self-closing doors to maintain energy efficiency. With standard LED illumination and robust mobility options, this fridge provides a professional and reliable cooling solution for any retail environment.
