Overview

High-Efficiency Commercial Beverage Dispenser

This commercial beverage dispenser is engineered for high-volume environments such as restaurants, cafes, and food service establishments. It features a robust stainless steel construction for durability and hygiene, alongside an advanced refrigeration system to ensure optimal drink temperatures. Designed for efficiency, the unit utilizes electric pump controls and automated water tank monitoring to maintain performance and reduce energy consumption.

Performance & Features

Cooling System	High-performance refrigeration
Energy Control	Electric pump control
Monitoring	Automated water tank temperature detection and display
Key Features	Easy Installation, High-Volume Dispensing, Automated Monitoring

Construction & Materials

Dispensing Options

- Cola
- Lemon
- Orange

Design Elements

Stainless Steel Construction • Illuminated Display • Drip Tray Included

Material Grade	304 Food-grade stainless steel
