Overview

High-Performance Soft-Serve Solution

This commercial ice cream machine is designed for high-volume production, making it an ideal choice for hotels, restaurants, cafes, and ice cream parlors. Built with durable stainless steel for hygiene and longevity, it features a robust refrigeration system that ensures rapid cooling and stable performance. With three dispensing heads, operators can serve multiple flavors simultaneously, maximizing service speed and efficiency.

Technical Specifications

Dispensing Heads	3 heads
Customization Options	Adjustable Voltage, Adjustable Frequency, Customizable Power

Design & Build

Key Features

- Digital control panel
- Built-in refrigeration system
- Drip tray included
- Ventilation grills for efficient cooling

Construction Material	Stainless Steel
Mobility Features	Yes

Performance

Operational Metrics

3 count Dispensing Heads	100 % Cooling Efficiency
