Overview

High-Performance Commercial Soft-Serve Solution

This high-performance appliance is designed for the efficient production of soft-serve ice cream, frozen yogurt, and sorbet. Engineered for durability and hygiene, it features robust stainless steel construction suitable for demanding environments like restaurants, cafes, and ice cream parlors. With a user-friendly digital display and multi-dispensing capability, this machine ensures consistent freezing and texture for professional service.

Technical Specifications

Model Number	8087229
Construction Material	Stainless Steel
Dispensing System	Three-handle system
Cooling System	High-efficiency refrigeration with active fan heat dissipation

Features

Suitable For

Hotels • Restaurants • Chain Stores • Cafes

Key Features

Digital Display, Removable Drip Tray, Multi-Flavor Capability, Consistent Freezing

Safety & Operation

Safety Requirements

- Proper electrical grounding required
- Voltage requirements must be strictly observed
- Avoid operating with an empty cylinder
- Regular maintenance operations recommended
