

Commercial Split Ice Machine

This commercial ice machine features air-cooled refrigeration for improved efficiency and energy savings. Microcomputer controls automate water filling, ice making, and ice dispensing.

Product Overview

High-Efficiency Commercial Ice Solution

This commercial split ice machine is engineered with advanced air-cooled refrigeration technology to maximize ice-making efficiency while reducing energy consumption. Designed for reliability in demanding food service environments, it features fully automatic microcomputer controls for seamless operation and maintenance. The robust stainless steel construction ensures durability, making it an ideal choice for high-volume applications in restaurants and bars.

Technical Features

Automation & Safety

- Microcomputer-controlled water and ice management
- Automatic fault protection
- Automatic recovery after power failure
- Fully automated ice-making cycle

Design Features

Unique ice bar design specifically engineered to shorten ice release time and increase overall production output.

Cooling Technology

Air-cooled refrigeration system

Certifications

Certified Quality

ISO 9001, ISO 14000
