Overview

Professional Commercial Ice Production

This commercial-grade ice machine is engineered for high-efficiency, large-scale ice production, offering daily capacities ranging from 1 ton to 30 tons. It utilizes advanced PLC micro-computer control with an intuitive touch-screen interface for precise management of ice thickness and automated operational cycles. Built with food-grade materials and a durable stainless steel exterior, it ensures sanitary operation and reliability for demanding commercial environments.

Technical Specifications

Construction Material

SUS 304 Stainless Steel • Food Grade

Daily Production Capacity

1 T

Minimum Capacity

30 T

Maximum Capacity

Available Ice Cube Sizes

- 22 x 22 x 22 mm
- 29 x 29 x 22 mm

Features

Automation Capabilities

Function	Status
Automatic Water Supply	true
Automatic Ice Freezing	true
Automatic Ice Falling	true
Auto-shutoff when full	true

Core Features

Micro-computer control, Touch-screen operation, Adjustable ice thickness, Automatic cleaning, Automatic pressure control, Auto-shutoff
