Product Overview

Professional Beverage Solution

This high-performance commercial beverage dispenser is engineered for high-volume service environments such as restaurants and cafes. It features a three-valve design for versatile flavor options and utilizes an imported pneumatic pump for consistent, stable operation. Constructed with food-grade 304 stainless steel piping, it ensures durability and hygiene, while the automated temperature detection system simplifies daily maintenance.

Technical Specifications

Cooling Performance

High Efficiency • Refrigerated

Core Features

- Automatic water tank temperature detection
- Digital temperature display
- Easy installation design
- Stable operational performance

Dispensing Valves

3 valves

Construction Material

304 Stainless Steel, Food Grade

Control System

Imported pneumatic pump
