Overview

High-Performance Trailer Tire

This 385/65R22.5 commercial trailer tire is engineered for medium and long-distance transport on paved roads. Featuring a robust construction with four longitudinal zigzag grooves, it delivers exceptional anti-skidding performance and high-speed stability. The design incorporates a low heat generation recipe and high-tensile steel cord structure to ensure superior durability, puncture resistance, and excellent retreadability for cost-effective fleet operations.

Technical Specifications

Tire Size	385/65R22.5
Tread Depth	17.5 mm
Rim Size	11.75
Overall Diameter	1071.4 mm
Section Width	386 mm
Tube Type	TL (Tubeless)

Performance Metrics

Key Performance Indicators

900 kPa Inflation Pressure	5000 kg Max Load Capacity
--------------------------------------	-------------------------------------

Application & Features	Trailer Position, Medium-Long Distance, Paved Road, Anti-Skidding, Puncture Resistant, Retreadable
------------------------	--

Load & Rating Table

Load & Ply Rating Options

Ply Rating	Load Index/Speed Symbol	Max Load (kg)
20	160K	4500
24	164J	5000
