

Commercial Under Bench Refrigerator

Commercial under bench refrigerator features stainless steel construction and digital temperature control. Heavy-duty casters provide easy mobility for use in professional kitchens.

Product Overview

Professional Under-Bench Cooling Solution

The GN 3100TN under-bench refrigerator is engineered for high-performance commercial kitchen environments. Featuring robust stainless steel construction and efficient air-cooling technology, this unit ensures consistent temperature maintenance between +2°C and +8°C. Designed with mobility and durability in mind, it provides a reliable storage solution for professional culinary operations.

Technical Specifications

Model Number	GN 3100TN
Overall Dimensions (L x W x H)	1795 x 700 x 850 mm

Performance

Cooling Method	Air Cooling
Operating Temperature	+2 to +8°C

Electrical Data

Power Consumption

400 W Power Rating	3.5 A Rated Current
------------------------------	-------------------------------

Electrical Safety Metrics

Metric	Value
Leak Current	<1.5 MA
Earthing Resistance	<70 mΩ

Construction & Features

Refrigerant	R134a (220g)
Shelving	1 layer, plastic coated
Design Features	Back Splash, Stainless Steel, Heavy-duty Casters
