

Commercial Vehicle Air Brake Valve

This heavy-duty air brake valve is designed for use in commercial vehicles. It regulates air pressure within the braking system, providing optimal performance and safety.

Product Overview

Heavy-Duty Air Brake Valve

This heavy-duty air brake valve is specifically engineered for commercial vehicles, serving as a critical component in the braking system. It is designed to regulate air pressure with precision, ensuring optimal performance and safety across a variety of operating conditions. Built for reliability, this valve is suitable for a wide range of truck and trailer applications.

Technical Specifications

Model Number	RL3518ZZ
Application	Commercial Vehicle, Truck, Trailer
Primary Function	Air pressure regulation for braking systems
