

Commercial Vehicle Urea Tank

This heavy-duty urea tank is designed for commercial vehicles. It is constructed from durable plastic with robust mounting hardware for secure installation and features multiple ports for fluid lines and sensors, a filler cap with tether, and integrated level monitoring components.

Product Overview

Heavy-Duty Urea Tank for Commercial Vehicles

This professional-grade urea tank is specifically engineered for commercial vehicle diesel exhaust fluid (DEF) systems. Constructed from highly durable plastic, it features robust mounting hardware to ensure secure, reliable installation even under harsh operating conditions. The integrated design includes essential components such as fluid port connections, a tethered filler cap, and built-in level monitoring sensors for efficient maintenance.

Technical Specifications

Material	Durable High-Grade Plastic
Application	Commercial Vehicles, DEF Systems

Key Features

Integrated Features

- Robust mounting hardware
- Multiple fluid port connections
- Tethered filler cap
- Integrated level monitoring sensors
