

Common Rail Fuel Injector for Diesel Engine

This common rail fuel injector is designed for diesel engines. It delivers precise amounts of fuel into the engine cylinders for optimal combustion.

Product Overview

Precision-engineered fuel injector for optimal combustion efficiency.

High-Performance Common Rail Fuel Injection

This common rail fuel injector is a precision-engineered spare part designed specifically for diesel engines. It ensures optimal fuel atomization and combustion efficiency, which directly contributes to enhanced engine performance and improved fuel economy. Built to withstand demanding operational conditions, it is a reliable solution for maintaining and repairing heavy-duty machinery engines.

Technical Identification

High-performance components designed for accurate fuel metering.

Part Identification

5263308

Primary Part Number

0.445120236

Secondary Part Number

Compatible Engine Model

QSL9

Engine Type

Diesel Engine

Manufacturing & Quality

Manufactured to meet stringent quality and conformity standards.

Place of Origin	China
Warranty	6 months
Compliance & Certifications	CE, RoHS, Verification of Conformity

Logistics & Trade

Secure packaging options available for international shipping.

Supported by major international express carriers for fast delivery.

Packing Details

- Original packing
- Neutral packing
- Custom branded boxes (with authorization)

Delivery Information

Service Type	Details
Lead Time	Within 3-7 working days after payment
Trade Items	EXW, FOB, CNF, CIF, CFR
Main Ports	Shanghai, Ningbo, Shenzhen, Guangzhou, Qingdao, Tianjin

Accepted Payment Methods

T/T • L/C at Sight • Western Union • Money Gram • PayPal
