

Communication Antenna

This communication antenna is designed for signal reception and transmission. Its robust construction ensures durability in various environmental conditions.

Product Overview

Professional Communication Antenna

This specialized communication antenna is engineered for reliable signal reception and transmission in demanding environments. Featuring a robust construction and a distinct paddle-shaped element with a central slot, it is optimized for consistent performance. The included metallic mounting bracket ensures secure and stable installation for various wireless communication system applications.

Design & Construction

Design Geometry	Paddle-shaped element with central slot
Mounting Hardware	Metallic mounting bracket

Application

Durability	Robust Construction • Environmental Resistant
Primary Applications	Wireless Communication, Signal Reception, Signal Transmission
