

Communication Antenna

This is a communication antenna designed for various applications. It features multiple connection points and a compact form factor.

Product Overview

High-Precision Communication Antenna

This communication antenna is engineered for reliable signal performance in a compact form factor. Featuring a robust design with precise structural dimensions, it is suitable for a wide range of professional communication applications. Its versatile mounting points allow for seamless integration into diverse system architectures.

Technical Dimensions

Structural Measurements

Measurement Point	Value (mm)
Primary Length	27
Primary Width	24
Depth A	11
Depth B	10.85
Connection Point Offset	3.5

Design Type

Compact • Multi-View Design
