

Communication Device Antenna

Electronic antenna designed for use in communication devices. Each package contains 100 pieces and measures 46x43.5x44.5cm, with a net weight of 12.5kg.

Overview

High-Performance Communication Antenna

This electronic antenna is designed for reliable signal transmission in communication devices. It is supplied in a compact, efficient packaging format suitable for high-volume logistics. Built for durability and performance, this component meets standard industry requirements for electronic integration.

Technical Specifications

Model Number	101-06-03C
Type	Electronic Antenna

Logistics & Packaging

Weight Specifications

12.5 kg Net Weight	14.5 kg Gross Weight
Package Dimensions (LxWxH)	46 x 43.5 x 44.5 cm
Quantity per Package	100 pcs
