

Compact 1500W Convector Heater with Adjustable Thermostat

This compact convector heater offers two heat settings: 750W and 1500W. It is equipped with an adjustable thermostat, thermal cut-off, and overheat protection.

Overview

Compact Efficient Heating

This compact 1500W convector heater is an ideal solution for personal or small-space heating requirements. Designed with a sleek black finish and a high-efficiency mesh grille, it ensures rapid and effective heat dissipation. The unit features intuitive rotary controls and a built-in power indicator, combining ease of use with reliable performance for localized warmth.
