

Compact 2.0 USB Speaker System

This 2.0 USB speaker system features a simple, elegant design. Its integrated design includes a subwoofer and satellite speakers, with an elevation angle for better sound in near field listening.

Overview

Compact 2.0 USB Speaker System

The Compact 2.0 USB Speaker System is an efficient audio solution designed for desktop environments. Featuring dual 3-inch full-range drivers, it delivers clear stereo sound with a frequency response ranging from 80Hz to 20KHz. Its USB-powered design and compact dimensions make it an ideal choice for space-constrained workstations, laptops, and mobile setups.
