

Compact 2.25-Inch 20W Speaker

This compact speaker features a 2.25-inch driver with a 0.5-inch coil and a 1.8 oz magnet. It has a 4 ohm impedance, a maximum power of 20 watts, and a frequency response of 80-22kHz.

Overview

Compact Audio Performance

The Compact 2.25-Inch 20W Speaker is a versatile audio component designed for integration into various sound systems. With a robust 20-watt maximum power handling and a frequency response range of 80Hz to 22kHz, it delivers clear and reliable audio output. Its compact design, featuring a 0.5-inch coil and a 1.8 oz magnet, makes it an ideal choice for space-constrained professional audio applications.

Technical Specifications

Maximum Power

20 W

Max Power

Driver Size	2.25 inch
Impedance	4 ohm
Frequency Response	80Hz - 22kHz

Construction

Voice Coil Size	0.5 inch
Magnet Weight	1.8 oz
