

Compact 5kW Electric Heater

This compact electric heater is suitable for systems with a capacity of up to 5kW. It can be easily monitored externally and configured with a display device using RS-485 communication.

Product Overview

Compact 5kW Electric Heater

This compact electric heater is engineered for small-capacity systems, supporting power loads up to 5kW. Designed for easy integration, it features fault contact monitoring and supports RS-485 communication for remote display configuration. This unit provides a reliable and efficient heating solution for various indoor professional environments.
