

Compact Agricultural Tractor for Small Farms

This tractor is a versatile and robust machine designed for a variety of agricultural tasks. Its compact design and powerful engine make it suitable for small to medium-sized farms.

Product Overview

Compact Agricultural Powerhouse

The TS-254 is a versatile and robust tractor engineered specifically for small to medium-sized farms. It combines a high-torque diesel engine with a multi-speed gearbox and a responsive hydraulic lift system to handle diverse agricultural tasks. With its compact chassis and advanced traction design, this machine offers reliable performance and comfort in varied field conditions.

Technical Specifications

Performance Metrics

25 HP

Engine Power

Core Features

- High-torque diesel engine
- Multi-speed gearbox
- Hydraulic lift system
- Responsive steering system

Design and Utility

Suitable Applications

Small Farms • Medium Farms • General Agriculture

Design Features

Compact Design, Durable Chassis, High Visibility Seat, All-Terrain Tires
