

Compact Alignment and Leveling Tool

This compact tool is designed for precise alignment and leveling tasks. Constructed from high-grade steel, it features adjustable feet for stability on uneven surfaces and a durable finish for corrosion resistance.

Product Overview

Professional Precision and Durability

The TC 0508 is a compact and robust tool specifically engineered for precision alignment and leveling tasks. Crafted from high-grade steel, it is built to withstand rigorous use in construction, woodworking, and engineering environments. Its adjustable feet ensure maximum stability on uneven surfaces, while the durable finish protects against corrosion and wear.

Physical Properties

Design Features

- Adjustable feet for stability
- Compact and lightweight build
- Corrosion-resistant finish

Material Composition

High-grade steel

Applications

Performance

Reliable Performance • Long-lasting Durability

Recommended Uses

Construction, Woodworking, Engineering
