Product Overview

Compact Ambient Illumination

This compact night light is engineered to provide reliable, gentle illumination for modern living spaces. Equipped with an integrated human body induction sensor, it offers automated lighting to enhance safety and convenience in hallways, bedrooms, and bathrooms. Its efficient design ensures it activates only when needed, combining ease of installation with long-lasting performance.

Technical Specifications

Induction Delay

15 s

Minimum Delay

19 s

Maximum Delay

Working Voltage

220 V

Key Features

Product Capabilities

- Human body motion induction
- Automatic low-light activation
- Energy-efficient operation
- Compact and modern design

Recommended Use

Hallways, Bedrooms, Bathrooms, Nurseries
