

# Compact Bread Toaster with Browning Control

This compact toaster is designed for toasting bread slices. It features a variable browning control for customized toasting preferences and operates on 110/220V AC.

## Product Overview

### Compact Toaster Efficiency

The WT-101B is a compact and efficient toaster designed specifically for reliable bread toasting performance. Its user-friendly interface allows for precise browning control, ensuring customized results every time. Engineered for versatility, it supports dual voltage standards for seamless integration in international markets.

## Technical Specifications

Model Number	WT-101B
Rated Voltage	110V AC, 220V AC

## Key Features

### Design Features

- Compact form factor
- Variable browning settings
- Universal compatibility

Browning Control	Yes
