

# Compact Ceramic Space Heater

This ceramic space heater provides 750W or 1500W of heating power. It features cool, warm, and hot wind selection, overheat protection, a safety tip-over switch, and 90-degree oscillation.

## Overview

### Efficiency Meets Portability

The Compact Ceramic Space Heater is a versatile solution for personal and small-room climate control. Utilizing advanced ceramic heating technology, it provides rapid and consistent heat output, while the integrated 90-degree oscillation ensures even warmth distribution. Designed with user safety at the forefront, the unit features reliable overheat protection and an automatic tip-over safety switch.

## Performance

### Heating Settings

- Cool
- Warm
- Hot

### Power Output

**750 W**  
Low Heat

**1500 W**  
High Heat

## Features & Safety

### Safety Certifications & Features

Overheat Protection, Tip-over Switch

### Oscillation

90 degrees
