

Compact CNC Lathe

This compact CNC lathe is designed for precision machining operations. It is suitable for small to medium-sized workpieces and ideal for educational or light industrial applications.

Product Overview

Precision Machining Solutions

The Compact CNC Lathe is a versatile benchtop machining solution designed for precision operations on small to medium-sized workpieces. Equipped with an embedded computer and SCM control system, it offers reliable performance for educational or light industrial environments. Its integrated design features a protective enclosure, a dedicated control panel, and essential components like a spindle, tool turret, and tailstock.

Technical Specifications

Model Number	CK6130
Control System	Embedded Computer, SCM

Design & Features

Machine Class

Benchtop Model • Compact CNC

Included Components

- Protective Enclosure
- Control Panel with Display
- Spindle
- Tool Turret
- Tailstock
