

Compact Combine Harvester

This compact combine harvester is designed for efficient harvesting in varied field conditions. It features a cutting platform, threshing mechanism, and cleaning system.

Overview

Compact Harvesting Solution

The Lion 2,5A is a compact combine harvester designed for efficient harvesting in various field conditions. It features a robust cutting platform with a header for gathering crops, a threshing mechanism for separating grains from stalks, and a cleaning system for removing impurities. This model is suitable for small to medium-sized farms and offers a balance of performance, reliability, and ease of use.

Performance Metrics

Cutting Width

2.5 m

Cutting Width

Engine Power

50 hp

Power Output

Technical Specifications

Grain Tank Capacity	1.5 m3
Undercarriage Type	Tracked

Features

Integrated Systems

- Cutting platform with header
- Threshing mechanism
- Grain cleaning system

Operational Benefits

Enhanced stability • Maneuverable • Intuitive controls • Compact design
