

Compact Countertop Soft Ice Cream Machine

This is a compact, space-saving soft ice cream machine designed for countertop use. It offers two separate flavors and one mixed flavor option, with a pre-cooling function to maintain ingredient freshness and a high-performance imported compressor.

Overview

Compact Soft Serve Solution

This compact countertop soft ice cream machine is designed for efficient, high-quality dessert production in limited spaces. Featuring advanced pre-cooling technology to maintain ingredient freshness and a powerful imported compressor, it ensures reliable performance and consistent cooling efficiency. With the capability to serve two distinct flavors plus a combined mixed flavor, this unit offers versatility for any commercial beverage or dessert menu.
