

Compact Digital Camera with LCD Screen

This digital camera features a built-in flash and optical zoom lens. It captures high-resolution still images and video, and has a color LCD screen.

Product Overview

Compact Digital Camera Solution

This compact digital camera is designed for versatile use, featuring a built-in flash and an integrated optical zoom lens for flexible framing. It includes digital image stabilization to help maintain clarity in your captures, supporting both high-resolution still images and video recording. With a built-in color LCD screen, users can easily navigate menus and review captured media on the go.
