

Compact Electric City Car

This compact electric car is designed for urban environments. It features a two-tone color scheme, standard headlights, integrated fog lights, a roof rack, and alloy wheels.

Overview

Urban Mobility Solution

This compact electric city car is specifically engineered for efficient urban navigation. Featuring a distinct two-tone design, it combines a maneuverable form factor with practical exterior utility features like a roof rack. It offers a modern, eco-friendly transportation option for dense city environments.
