

Compact Electric Scooter for Urban Commuting

This electric scooter is designed for short-distance commuting and personal transportation. It features a step-through frame, a single headlight, and a small windscreen.

Product Overview

Compact Urban Commuter

The F-14 SRPE is a compact electric scooter specifically engineered for efficient urban commuting. Featuring a stylish red and black color scheme with silver accents, this model offers a practical step-through frame design for easy mounting and dismounting. Its small-tire configuration and streamlined profile make it an ideal solution for navigating busy city environments and short-distance personal transportation.
