

Compact Electric Urban Vehicle

This compact electric vehicle is designed for urban transportation. It features a boxy design with a short wheelbase and four doors.

Overview

Compact Electric Urban Vehicle

This compact electric vehicle features an innovative, ergonomic design concept aimed at providing a luxury experience for passengers. Its efficient, short-wheelbase build makes it an ideal solution for navigating tourist attractions, parks, and large communities. Designed for comfort and utility, it serves as a reliable transport option for hotels, schools, and garden-style resorts.
