Product Overview

Efficient Kitchen Hot Water Solution

This compact electric water heater is specifically designed for kitchen environments, offering a space-saving solution for on-demand hot water. Its versatile design allows for installation both under or above the sink, making it ideal for small spaces and various kitchen layouts. Featuring a high-impact resistant body and customizable aesthetic options, it combines durability with a modern look that blends seamlessly into any professional or domestic kitchen.

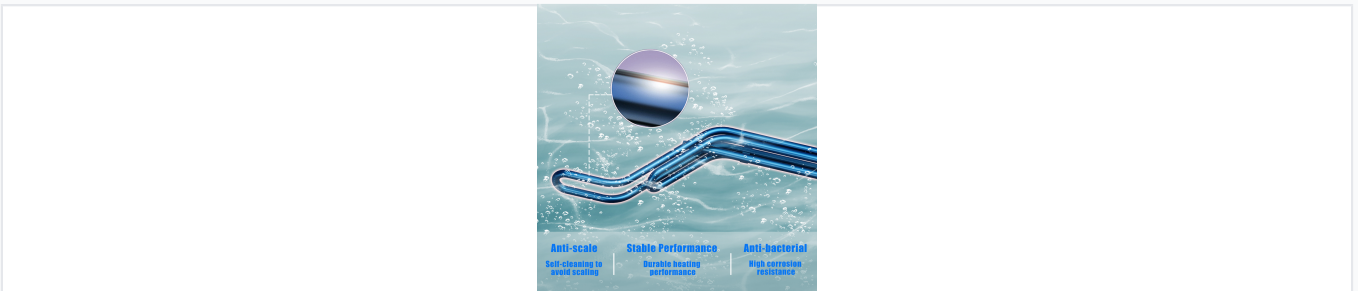

Core Performance

Performance Highlights

67 %

Leakage Risk Reduction

Technical Features

The specialized heating element features self-cleaning and anti-scale technology for long-lasting, stable performance.

Heating Element Technology

Anti-scale, Self-cleaning, Anti-bacterial, High Corrosion Resistance, Stable Performance

Tank Construction

Our exclusive single weld line design reduces leakage risk by over 67% compared to traditional triple-weld tanks.

Inner Tank Specifications

Feature	Specification
Tank Type	Blue Diamond Inner Tank
Material	Customized thickened SPCC
Weld Design	Exclusive Single Weld Line
Application	Suitable for high-rising applications

Design & Installation

Installation Flexibility

- Under-sink mounting
- Above-sink mounting
- Single-point application
- Multi-point application

Body Construction	High impact resistant body
Customization Options	Multiple colour options for outer shell and service panel

Control Interface

Temperature Adjustment	Manual knob with Low to High settings
Operation Indicator	Yes
