

Compact Excavator, 1030kg, 0.02m3 Bucket

This compact excavator has an operating weight of 1030kg. It features a standard bucket with a capacity of 0.02m3.

Overview

Compact Performance

This 1030kg compact excavator is engineered for high versatility and efficiency in restricted job sites. It features a reliable hydraulic system combined with a 7.5KW engine to deliver consistent digging power. Designed for utility and landscaping tasks, its small footprint ensures excellent maneuverability without compromising operational stability.
