Overview

Compact Performance Excavator

This versatile mini excavator is engineered for high performance in confined environments, offering excellent maneuverability and precision. It features an extendable chassis and ergonomic servo-controls to ensure operator comfort and work efficiency. With high-visibility design and reliable safety systems, it is an ideal solution for landscaping, utility, and light construction tasks.

Operational Features

Extendable Chassis Width	980 - 1310 mm
Operational Highlights	Mechanical pilot operation, Travel pressure discharge, Side fuel injection, Dismountable cabin

Ergonomics and Safety

Control System

- Servo-controls for precision
- Ergonomic arm supports
- High-visibility integrated hood design
- Narrow lever track to reduce effort
