

Compact Excavator with 0.05 m3 Bucket

This compact excavator is designed for versatile applications in construction and landscaping. It features a robust hydraulic system for efficient digging and lifting.

Overview

Compact Excavator Efficiency

This compact excavator is designed for versatile applications in construction, landscaping, and urban environments. It features a robust hydraulic system for efficient digging and lifting, combined with a durable undercarriage for excellent stability on various terrains. The unit is engineered for reliability in confined spaces, offering professional-grade performance and operator comfort.

Performance

Key Performance Indicators

10 kN

Max Digging Force

58 %

Max Gradeability

2 km/h

Travelling Speed

14.65 kN

Max Traction

Hydraulic System

Hydraulic System Details

Feature	Value
Operating Pressure	16 MPa (2320 PSI)
Pump Capacity	8.2 + 8.2 + 3.2 ml/r

Operation

Swing and Motion

- Platform Swing Speed: 10-12 rpm
- Digging Arm Swing Angularity: 49°/49° (left/right)

Capacity

Bucket Capacity	0.05 m3
