Product Overview

Compact Ventilation Solution

This compact exhaust fan is engineered for efficient air circulation in enclosed spaces such as bathrooms and kitchens. Constructed with a durable housing and a high-performance copper motor, it effectively removes odors and excess moisture. The inclusion of a backdraft damper ensures that air does not re-enter the room when the unit is powered off, making it a reliable choice for maintaining indoor air quality.

Technical Specifications

Construction Materials

- ABS Plastic
- Steel
- Copper (Motor)

Available Sizes 8 inch, 10 inch, 12 inch

Model Number GS-8806A

Features

Key Features

Backdraft Damper • Quiet Operation • Wall/Window Mountable • Compact Design

Recommended Applications

- Bathrooms
- Kitchens
- Enclosed living spaces
