Product Overview

Energy-Efficient Lighting Solution

This compact fluorescent lamp (CFL) is engineered as a highly efficient alternative to traditional incandescent bulbs. Featuring a 2U multi-tube design, it maximizes light output while significantly reducing energy consumption. With versatile base options and color temperature choices, this bulb is suitable for a wide range of residential and commercial lighting applications.

Technical Specifications

Base Compatibility

E27 • B22

Power Consumption

15 W

Input Voltage

110V, 220V

Color Temperature

2700K, 6500K

Tube Design

2U T3

Key Metrics

Performance Highlights

15 W

Wattage

2 U
