

Compact Folding Electric Bicycle

This compact electric bicycle features a step-through frame and small wheels for portability. It is designed for urban commuting and recreational riding, with an integrated battery pack and rear hub motor.

Product Overview

Urban Mobility Solution

This compact electric bicycle is engineered for seamless urban commuting and versatile recreational riding. Featuring a convenient step-through frame design and a space-saving folding mechanism, it is ideal for professionals with limited storage or those using multi-modal transport. The lightweight alloy construction ensures durability without compromising portability, while the integrated battery and rear hub motor provide reliable power for daily trips.
