

Compact Fruit and Vegetable Juice Extractor

This single pressing machine efficiently extracts juice from various fruits and vegetables. Its compact design includes a transparent upper section and a control knob for easy operation in household kitchens.

Product Overview

Professional Juice Extraction Performance

This compact fruit and vegetable juice extractor combines a streamlined, stylish design with advanced food-grade materials to ensure safety and hygiene. Equipped with high-performance motor technology and sharp, durable alloy blades, it delivers efficient cross-cutting and high juice yield. The unit features integrated slag-juice separation and dual-layer splash protection for a clean and reliable extraction experience.

Technical Specifications
