

Compact Gas Water Heater with Digital Display

This compact gas water heater is designed for efficient and on-demand hot water supply. It features adjustable heating power and water flow controls for customized performance and includes a digital display for monitoring temperature and operational status.

Product Overview

Compact Gas Water Heater

This compact gas water heater is engineered for efficient, on-demand hot water supply, making it an ideal solution for residential applications with limited space. It features precise adjustable heating power and water flow controls, allowing users to customize performance to their specific needs. The integrated digital display provides real-time monitoring of temperature and operational status, ensuring reliable and user-friendly performance.

Technical Specifications

Model Number	JSG16-BOW
Fuel Type	Liquefied Petroleum Gas (LPG)

Key Features

Best For

Residential Use • Compact Spaces • Instant Hot Water

Control Features

Adjustable Heating Power, Water Flow Control, Digital Temperature Display
