

Compact Gasoline Engine 1.87kW

This compact gasoline engine features a 1E40F-C(50) model designation and provides a rated output of 1.87kW at 6500rpm. Weighing 10kg, the engine is designed for applications needing a reliable power source and includes a fuel tank and base frame.

Overview

Compact & Reliable Gasoline Engine

This compact gasoline engine is engineered for versatility and portability, making it an ideal power source for various small-scale machinery and equipment. With a rated output of 1.87kW, it delivers consistent performance while maintaining a lightweight, manageable design. Its sturdy base frame ensures stability during operation, providing a reliable solution for professional applications requiring mobile power.
